Kolkata, West Bengal, India | +91 8918156013 | pratyay222@gmail.com

Portfolio: pratyay-poddar.github.io/portfolio/ • GitHub: github.com/pratyay-poddar

OBJECTIVE

An aspiring Computer Science and Engineering student with strong core programming foundations, specialized in Data Structures and Algorithms (DSA), and actively developing engineering competence in server-side backend development using Go. Driven to build robust, highly efficient architectures and solve complex technical challenges.

EDUCATION

Institute of Engineering & Management (IEM), Salt Lake, Kolkata

2026 – 2030

Bachelor of Technology (B.Tech) in Computer Science and Engineering (CSE Core)

TECHNICAL SKILLS

Programming:	Go (Golang), C++, JavaScript, HTML5, CSS3
Backend & Data:	Go REST APIs, SQLite, Core Database Management Systems
Computer Science:	Advanced Data Structures and Algorithms (DSA), Sorting & Searching Algorithms, Logic Optimization
Developer Tools:	Git, GitHub, Linux Environments

PROJECTS

Sudoku Solver | https://github.com/pratyay-poddar/Sudoku_Solver

C++

- Engineered an algorithmic solver specifically optimized for customized 3x3 grid configurations using backtracking principles.
- Designed strict rule-enforcement constraints to prune recursion trees and achieve rapid runtime matrix solutions.

Unbiased AI Decision Matrix |

C++

<https://github.com/pratyay-poddar/Unbiased-AI-Decision>

- Built a logic-driven mathematical weighing system designed to eliminate user cognitive bias in multi-variable choice scenarios.
- Structured custom logical pathways to evaluate multi-faceted criteria objectively through console interfaces.

Login and Registration System |

C++

https://github.com/pratyay-poddar/Login_and_Registration_System

- Developed a local authentication utility utilizing file-handling pipelines to securely read, write, and validate persistent user records.

Personal Portfolio | <https://github.com/pratyay-poddar/portfolio>

JavaScript, HTML5, CSS3

- Designed a minimalist, highly responsive dark-themed digital portfolio platform to showcase backend software utilities.

CGPA Calculator | <https://github.com/pratyay-poddar/CGPA-Calculator>

- Created a functional web-based CGPA calculator utility streamlining grade evaluation logic.
